Continuation of Substance of Interview including description of the general nature of what was discussed: It was observed that pending claim 2193 conflicted with claim 210 of applicant's copending application 09/841,491, now US 6,745,831, insofar as no patentable distinction seen between a hydrocarbon formation and a coal formation. Thus, applicant was advised that a terminal disclaimer would be required against said US 6,745,831, before the pending case could be allowed..
